

ONE OR TWO DAY HANDS-ON FOUNDATIONS CLASS

This class covers all woodturning basics from A to Z. Even for those turners with some experience I believe a strong understanding of the basics will make turning more fun and enjoyable. The outline below details the topics covered.

Lyle Jamieson Foundations Class at his Traverse City Studio 1 or 2 Day Format

- Faceplate turning, start to finish
- Learn effortless tool control with a bowl gouge
- Grain orientation
- Sharpening
- Reducing torn out grain
- Green wood properties and handling
- Eliminate catches, no fear turning
- Chucking techniques
- Sanding procedures
- Finishing tips

The first day we just blow shavings on the floor and have fun mastering tool control and secure chucking with glue blocks. The second day we put it all together and make a bowl, from design to bottom treatments.

The bottom line is I am into easy, I don't like to work hard, and I don't like to sand. Students will learn to make cuts to start sanding with 320 grit sandpaper.

Many times the class format is one-on-one.

I am scheduling classes frequently; please call me at 231-947-2348 to check availability.
